At Dacris Software Inc., we believe that advanced software should not be hard to use. Our software products are professional, affordable, and highly innovative.

ActiSetup™ 2005

The complete Windows Installer distribution solution.

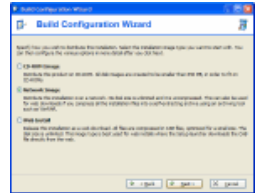

Create installations in minutes, at an affordable price!

Features

1. Interactive Wizards

The ActiSetup Project Wizard makes it really easy to create an installation rapidly. Within less than 10 minutes, you can create a basic installation for your product using the ActiSetup Project Wizard.

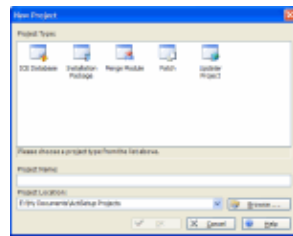

2. Fully Customizable Interface

ActiSetup allows you to customize your installation's user interface to your heart's content. The ActiSetup designer mimics the Visual Studio designer, allowing you to add / remove forms, and to edit the controls on those forms. Since ActiSetup even allows custom controls, there is essentially no limit to how much you can customize your installation's user interface.

3. Single-File Distribution

What is the easiest way to distribute a program over the web? Package the installation into a single EXE file! ActiSetup can package an entire installation into a single EXE file, so all you need to do is publish that file to the web.

4. Windows Installer Support

Windows Installer works by reading MSI files and performing the actions configured inside these files. ActiSetup provides a way to create these MSI files easily, without you having to know the file format. Windows Installer supports several basic types of installation packages, including *installations*, *merge modules*, *patches*, and *transforms*. Each of these has its own special purpose. ActiSetup allows you to easily author, using the same interface, all of these installation types.

5. Online Updater and Smart Setup Launcher

Dacris Updater, included with ActiSetup, is a program that allows you to search for and provide updates for your products. With this updater service, you can deliver patches to users of your application securely and efficiently. The smart *Setup.exe bootstrapper* included with ActiSetup is a setup launcher application that can install additional prerequisite components, such as the .NET Framework.

Advantages

1. Affordable

For only \$249 US, ActiSetup is easily the most affordable product in its class.

2. Dependable

ActiSetup supports the proven Windows Installer technology for fewer support headaches and wider compatibility.

3. Complete

Supporting installations, merge modules, patches, and transforms, ActiSetup gives you everything you need to distribute your applications.

4. Easy To Use

With many wizards for common tasks, ActiSetup makes setup authoring very easy. You can build complete installations only minutes.

5. Extensible

You can customize your installation's user interface to your heart's content with ActiSetup. Using the MSI table editor, any installation can take full advantage of the many features of Windows Installer.

Testimonials

Tajddin Maghni, CEO, Magnoware Systems

"We've been using ActiSetup for quite some time now, and it's without a doubt the best setup authoring tool."

Andrew Jo, Deployment Manager, Softevo Inc.

"Finally a software product rivaling that of InstallShield, in both quality and price!"

Pricing

Single Developer License	\$249
Site License	\$3795

Notes

1. All prices are in U.S. dollars.
2. All language packs are included with each license.
3. Unlimited 24/7 technical support is available with each license.

What's New

ActiSetup 2005 brings many exciting enhancements. The primary changes in this release are:

Windows Installer Support

For the first time, ActiSetup 2005 can build full-featured Windows Installer packages: anything from installations to patches and merge modules.

ActiSetup 2005 now supports Windows Installer version 3.0. You can also build installations for any previous versions of Windows Installer.

Integrated Project Distribution

With ActiSetup 2005, you can now create multiple build configurations and customize the way your application is packaged. ActiSetup 2005 includes a brand-new setup bootstrapper, designed to simplify the process of installing prerequisites such as the .NET Framework.

Online Updater

New to this version of ActiSetup is a tool called Dacris Updater. With this updater service, you can deliver patches to users of your application securely and efficiently. Dacris Updater simplifies the process of looking for updates online.

Ordering Information

You can try ActiSetup for free for two weeks or purchase the full version. See the links below.
